

TOTEM

A totem is the symbol and protection of a clan.

TOTEM is a collection of must-have cigar accessories, of the best craft and with a unique twist, uniting aficionados & aficionadas in the same clan of sophisticated people with unfailing good taste.

TOTEM is also a tribute to Native American culture, the first who were using tobacco smoke to communicate with the gods and establish peace between tribes.

Native Americans expressed ideas through symbols, and the Totem logo stands proud of its strong signification:

KEEP

A new line of humidors in 3 different sizes.

Entirely made by hand for TOTEM in a careful process over 3 to 4 weeks, each humidor shows a stunning piano-lacquer finish | Designed and produced by French

- KEEP -

Embellished with the most fascinating elements of the Native American iconography also used on the TOTEM ashtrays, these humidors are of the highest quality and are made by a French-run workshop who caters to luxury brands; each piece necessitating 3 to 4 weeks of work.

- MATERIALS - of the utmost quality & finish

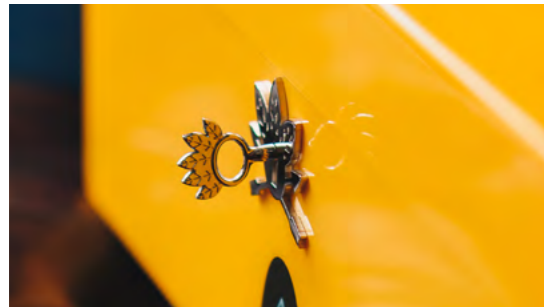

TOTEM humidors are 'piano-laquered' with 20 layers of varnish that offer a perfect shine of the highest quality. The inside is made of Okume, a wood that has no odour and does not release any resin on the cigars.

Humidors are very sensitive to scratches and should be handled with care. Cleaning is recommended with a smooth cloth and no detergent.

As with the other TOTEM items, there is no branding on the outside, enabling the unique designs to fully shine.

The TOTEM logo can be found on the inside lid of the humidors, delicately pyrographed on the Okume wood.

Because attention to the detail is TOTEM's signature, the colourful humidors have been offered a custom-designed lock and key, reminiscent of the brand's logo and its meaning.

TOTEM humidors come complete with their own electronic hygro-thermometer.

It is pre-calibrated and is provided with ready-installed battery. Just remove the insulation tap, place it on the lid and it is ready to get into action. Cigars should be kept at 65% to 70% humidity and a temperature of 16 to 21°C.

In a quest of efficiency, the humidors are sold with a complete set of Boveda humidifying system: the wooden holder and a starter kit.

Boveda packs just need to be replaced every 3 months or when dry.

- HYGRO-THERMOMETER -

Indicating hygrometry and temperature with a 1% precision, it comes with all TOTEM humidors and can also be purchased separately. Very easy to use, it is pre-calibrated and can be placed on all metallic surfaces, thanks to the inner magnet.
